

# ALCANAR

*Alfalfa variety created by El Solc*

## Features

- ✓ Aragon ecotype variety with more foliage and higher protein content.
- ✓ Faster and more vigorous regrowth.
- ✓ Higher dormancy score than Aragon alfalfa, between 7 and 8, which results in more growth and an earlier exit from the winter pause.
- ✓ Excellent stem-leaf ratio, allowing for a high protein content and high digestibility.
- ✓ Good persistence.
- ✓ Good behaviour in the face of disease.

**VIGOUR  
PROTEIN  
REGROWTH**

## Main strengths

- ✓ Good production with an excellent protein content.
- ✓ Excellent regrowth.
- ✓ Perfectly adapted to the continental Mediterranean climate.
- ✓ Good adaptability with an excellent quality of forage.
- ✓ High persistence.

Technical features		
Productivity	High	↑
Protein	Very high	↑ ↑
Regrowth speed	Very fast	↑ ↑
Dormancy score	7 - 8	↑
Disease resistance	High	↑
Steam / Leaf ratio	Optimal (1.25/1)	↑ ↑
Persistence	Medium	→

## Protein performance in 3 years

Test of protein quantity in alfalfa varieties in the Ebre River Valley during 3 years in 3 distinct locations (2015-2018):

■ Alcanar
 ■ Aragon
 ■ Control

CONTROL: Average of 2 varieties from the competition.
