

# ALCOR

*Alfalfa variety created by El Solc*

## Features

- ✓ Improved Aragon ecotype variety, but with higher performance and quality.
- ✓ Faster and more vigorous regrowth.
- ✓ Higher dormancy score than Aragon alfalfa, resulting in more growth and an earlier exit from the winter pause.
- ✓ Excellent stem-leaf ratio, allowing for a high protein content and high digestibility.
- ✓ Elevated persistence.
- ✓ Good behaviour in the face of disease.

**PRODUCTION  
REGROWTH  
PERSISTENCE**

## Main strengths

- ✓ Excellent production with a high protein content.
- ✓ Excellent regrowth.
- ✓ Perfectly adapted to the continental Mediterranean climate.
- ✓ High adaptability and plant health.
- ✓ High persistence.

Technical features		
Productivity	Very high	↑ ↑
Protein	High	↑
Regrowth speed	Very fast	↑ ↑
Dormancy	8	↑ ↑
Illness resistance	High	↑
Steam / Leaf ratio	Good (1/1)	↑
Persistence	Very high	↑ ↑

## Protein performance in 3 years

Test of protein quantity in alfalfa varieties in the Ebre River Valley during 3 years in 3 different locations (2015-2018):

■ Alcanar
 ■ Aragon
 ■ Control

CONTROL: Average of 2 varieties from the competition.
