

SOLITA

Italian ryegrass variety created by El Solc

Features

- ✓ High-performing Italian ryegrass.
- ✓ Tetraploid ryegrass with the drying speed and fineness of a diploid.

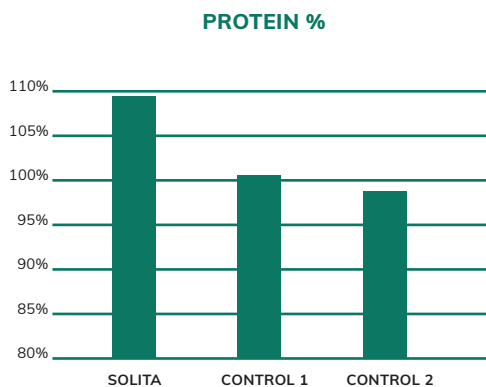

Main strengths

- ✓ Ryegrass with a high protein content and very high digestibility, making it a forage cattle love.
- ✓ Variety with a high tillering capacity, resulting in a high density of long, thin stems.
- ✓ Its excellent drying makes it perfect for sowing and haymaking.

**PRODUCTION
DRYING
FINENESS**

Test on diploid ryegrass varieties in the Ebre River Valley:

* Taking the arithmetic mean of controls 1 and 2 as a reference.

Phytosanitary treatments

- ✓ No treatment is needed to preserve plant health thanks to its resistance to rusts.
- ✓ To improve the quality of forage, if needed, a treatment to control dicotyledonous plants should be applied.

Fertilizer recommendations

- ✓ Crop extractions in kg of nutrients for every 1,000 kg of dry material:

N	P ₂ O ₅	K ₂ O
300 - 320	75 - 100	200 - 250

- ✓ Top dressing with nitrogen fertilizer is recommended, applying 100-120 kg of N/ha per forage cut. According to production capacity.
